PERSONAL SUMMARY

Graphic Designer with 2 years' experience creating brand, digital, and campaign design for organisations reaching 5M+ users (AgroStar) and 10,000+ members (MCCIA). Skilled in branding, visual design, social media and marketing creative, and building scalable design systems, with a track record of strengthening brand consistency and elevating visual identity across web, app, and campaign touchpoints.

WORK EXPERIENCE

Freelance Graphic & UI Designer - *Self-Employed, Remote* *April 2026 – Present*

- Client project (Swojas Enterprises): redesigned 6 landing pages in Figma and Webflow — restructured layouts, added micro-animations, and built a cohesive design system to elevate brand identity and usability.
- Designed 50+ screens for an e-commerce plant-retail app, translating brand and visual guidelines into a consistent, on-brand digital experience across user journeys.
- Self-initiated project (ongoing): leading visual and product design for a productivity app concept, including competitive analysis, visual identity direction, and a usability-focused UI.

Digital Experience Designer - *MCCIA, Pune-Maharashtra* *Jan 2025 – March 2026*

- Grew event audience reach and social engagement as Social Media Head by directing end-to-end content production — videography, editing, and graphic design — for large-scale events (PIBS, Pune Expo).
- Strengthened brand consistency across all digital touchpoints by producing social media creatives, event banners, and marketing collateral within defined brand guidelines for an audience of industry professionals.
- Delivered multiple concurrent campaigns on time and to brief by collaborating with cross-functional teams and managing competing creative priorities under tight deadlines.
- Redesigned the MCCIA website end-to-end for 10,000+ members, restructuring visual hierarchy and layout for a modernised, on-brand platform.

Graphic Designer Intern - *AgroStar (U-Link Agritech Pvt. Ltd.), Pune* *July 2024 – Dec 2024*

- Reinforced brand identity across consumer-facing channels by designing social media creatives, promotional content, and product packaging with a consistent visual language.
- Built a scalable Figma design system with reusable components, documented tokens, and standardized guidelines adopted across the team, reducing design-to-development handoff time.
- Improved usability and visual consistency for the AgroStar and Saathi apps (5M+ users) by contributing to a full-cycle UX/UI redesign — research, wireframing, prototyping, and high-fidelity UI delivery.
- Accelerated campaign and product launches by bridging design and business goals as liaison between development, marketing, and communications teams across app, web, and campaign workstreams.
